

9th ERA Workshop

International Collaborations on Radon

Wed 13 Oct 2021, 13:00 – 17:00, Fribourg (Switzerland)

The aim of the workshop is to explore existing collaborations among international organisations (WHO, IAEA, EC) and international associations in the medical and building environment. Further, the workshop will serve to identify the need for a better collaboration in specific fields and will search for possibilities to improve collaborations.

Speakers from all main international organisations and associations will present their experience and their expectations with respect to collaborations to improve radon protection globally.
